Laboratory Test Report

Laboratory is NABL Accredited

Reference No.	: - 2605013700	Age/Gender	: 44 Yrs/Female
Pt's Name	: Mrs. KAVITA		GRN-RGL
Referred By	: NA		
Sample Collection Date/Time	: 24-May-2026	Date	:24-May-2026
Sample Receiving Date/Time	: 24-May-2026 03:24PM	Approved Date	:24-May-2026 04:02PM
Sample From	: GRN-ROHIT GRENO LABS	Report Print Time	:24-May-2026 04:27PM

Biochemistry

Test Description	Observed Value	Biological Reference Interval
------------------	----------------	-------------------------------

Blood Glucose Fasting Fluoride plasma

Blood Glucose Fasting Hexokinase	112.0	70.0 - 110.0 mg/dL
-------------------------------------	-------	--------------------

Interpretation (In accordance with the American diabetes association guidelines):

- A fasting plasma glucose level below 100 mg/dL is considered normal.
- A fasting plasma glucose level between 100-126 mg/dL is considered as glucose intolerant or pre diabetic. A fasting and post-prandial blood sugar test (after consumption of 75 gm of glucose) is recommended for all such patients.
- A fasting plasma glucose level of above 126 mg/dL is highly suggestive of a diabetic state. A repeat fasting test is strongly recommended for all such patients. A fasting plasma glucose level in excess of 126 mg/dL on both the occasions is confirmatory of a diabetic state.

Laboratory Test Report

Laboratory is NABL Accredited

Reference No.	: - 2605013701	Age/Gender	: 44 Yrs/Female
Pt's Name	: Mrs. KAVITA		
Referred By	: NA		GRN-RGL
Sample Collection Date/Time	: 24-May-2026	Date	:24-May-2026
Sample Receiving Date/Time	: 24-May-2026 03:26PM	Approved Date	:24-May-2026 04:02PM
Sample From	: GRN-ROHIT GRENO LABS	Report Print Time	:24-May-2026 04:27PM

Test Description	Observed Value	Biological Reference Interval
------------------	----------------	-------------------------------

Blood Glucose PP Fluoride plasma

Blood Glucose Post Prandial

150.0

90.0-140.0 mg/dL

Hexokinase

Comments:

Fasting Glucose Plasma	2 hr Plasma Glucose (mg/dL)	Diagnosis
≤ 99	≤ 139	Normal
100 to 125	140 to 199	Pre-Diabetes
≥ 126	≥ 200	Diabetes

* Confirm by repeating the test on a different day

Impaired glucose tolerance (IGT) fasting, means a person has an increased risk of developing type 2 diabetes but does not have it yet.

A level of 126 mg/dL or above, confirmed by repeating the test on another day, means a person has diabetes.

IGT (2 hrs Post meal), means a person has an increased risk of developing type 2 diabetes but does not have it yet. A 2-hour glucose level of 200 mg/dL or above, confirmed by repeating the test on another day, means a person has diabetes

Blood Glucose Goals	For people with Diabetes
Before meal	70-130 mg/dL
2 hours after meal	< 180 mg/dL
HbA1c	< 7%
